### NEWS

12/03/24.

IEC/IEEE 82079-1:2019 AND ISO 24183:2024: WHICH STANDARD DO WE - AND SHOULD WE - FOLLOW?

ISO 24183 "Technical communication - Terminology" was published in January 2024.

According to the announcement on the ISO website, ISO 24183 "defines terms for the theory and application of technical communication." When ISO 24183 was drafted, the recommendations of the ISO/IEC Guidelines Part 2 to use existing terminological entries from international standards were not always followed. In order

## ABOUT US

**What and who is tekom Danmark?**

**tekom Danmark** provides a platform for the exchange of information and experience, and promotes training, advanced qualification, and further professionalisation, predominantly to professionals in Denmark in the field of technical communication. It was founded in November 2012 and is one of the bigger country organisations within tekom Europe **with 114 officially registered members**.

tekom Europe is the largest professional organisation for technical communication in Europe consisting of around 9,500 members. All country organisations are run on a not-for-profit basis.

According to the regulatory statutes of tekom Europe, tekom Danmark is run by a volunteer-based **country organisation (CO)** board that consists of four members, including a country delegate who represents tekom Danmark in the tekom Europe Assembly of Delegates (the decision-making group within tekom Europe). The current CO board is elected for the current period until the end of 2025.
